

Red PPE Go Bag: Contents and Process

Contents:

- 9 universal blue gowns
- 9 face shields
- 9 small N95 (in clear plastic bag labeled with "S")
- 9 regular N95 (in clear plastic bag labeled with "R")
- 1 purple padlock seal

Assembly Process:

- Assemble all items into bag (as per contents above)
- Join the bag zipper (on top of bag) to the front pocket zipper and lock the two together with a white padlock seal

Post Code Process:

- Nursing Attendant delivers used PPE bag to Materials (secured with purple pad lock) to exchange for a new bag
- Materials gives nursing attendant fully prepared replacement bag sealed with white pad lock seal
- Materials will take inventory of the used bag and replenish per contents list
- The newly replenished bag will be secured with a white pad lock seal
(*Always have prepared bag readily available for post code exchange)
